WORK EXPERIENCE

ICICI Bank, Mumbai, India

August 2023 – June 2025

Deputy Manager II – Treasury IT (Data Analyst & Engineer)

- Led a data optimization and purging initiative on **40M+ treasury trade records**, reducing end-of-day warehouse processing time by **80%** and significantly improving analytics performance
- Built automated **ETL pipelines using SQL and Linux shell scripting** to safely purge high-volume trade data, ensuring data integrity and zero disruption to downstream treasury systems and reporting workflows.
- **Performed trade-level P&L analysis and anomaly detection to resolve issues related to trade.**
- **Collaborated** with Treasury, Risk, and Front Office teams to translate financial requirements into scalable data workflows and **optimized large-scale queries.**
- Supported analysis of **FX and derivatives-linked trades**, developing understanding of market movements, pricing logic, and their impact on P&L and risk exposure.

EDUCATION

Sardar Patel College of Engineering, Mumbai, India

Aug 2019 - June 2023

Graduated with a **Bachelor of Technology in Electrical Engineering**

(CGPA 8.51/10)

Relevant Course: Fundamentals of AI and Machine Learning, Image Processing, Control System Design, Signals and System, Computer Architecture, Microcontroller and Microprocessor.

PROJECTS

Secure Document Q&A System (Local RAG for NBFC Compliance) [\[Link\]](#)

April 2026

- Built a fully local **RAG-based Q&A system** using Mistral (Ollama), ChromaDB, and Sentence Transformers for **secure, source-grounded querying** of financial documents with **zero data leakage.**
- Developed an end-to-end pipeline with **paragraph chunking, retrieval tuning, and anti-hallucination logic**, improving answer reliability and optimizing performance for **low-resource (8GB RAM)** environments via Streamlit.
- **Technologies: Python, Streamlit, Ollama (Mistral LLM), ChromaDB, Sentence Transformers, Pandas**

Autonomous A/B Test Insight Agent [\[Link\]](#)

Oct 2025

- Developed an AI-powered dashboard that automates **hypothesis testing (z-tests, t-tests)** and **p-value** calculation, ensuring **95%+ confidence** in experimental results.
- Integrated the **Groq LLM API** to synthesize raw statistical data into natural-language executive summaries and actionable business recommendations.
- **Technologies: Python, Streamlit, Groq API (Llama 3), Pandas, SciPy, Matplotlib**

Hybrid Log Classification System [\[Link\]](#)

Aug 2025

- Engineered a **multi-stage NLP pipeline** using **BERT** and **Regex** to classify complex system logs, incorporating an **LLM fallback mechanism** to resolve edge-case ambiguities.
- Implemented **DBSCAN clustering** to identify recurring log patterns and automated the detection of novel system errors, reducing manual troubleshooting time.
- **Technologies: Python, Hugging Face, scikit-learn, Groq API, Pandas**

TECHNICAL SKILLS

- **Analytics & Programming:** Python, SQL, C++, Java, R, SAS
- **Data Processing & Feature Engineering:** Pandas, NumPy, Data Cleaning, Feature Engineering, ETL Processes
- **Data Engineering & Databases:** MySQL, Oracle, Snowflake (working knowledge), PySpark, Query Optimization
- **Machine Learning:** Predictive Modelling, Statistical Analysis, Classification Models, Time-Series Forecasting, scikit-learn, LLMs, RAG Systems, NLP (BERT, Transformers), Prompt Engineering
- **Tools & Platforms:** Git, Flask, Linux, AWS EC2

LEADERSHIP & COMPETITION/CERTIFICATES

- **Secured 3rd place** among final-year projects for **advanced deep learning-based multispectral image dehazing** (SPCE, 2023) [\[Link\]](#)
- **Team Leader, SPCE Robocon (2022):** Led 21-member team to design, prototype, and manufacture a competition-ready robot for DD Robocon.
- **BCG Data Science Job Simulation (Forage):** Performed customer churn analysis, engineered a Random Forest model, and delivered strategic insights through visualizations. [\[Link\]](#)
- **Prompt Engineering & Programming with OpenAI Columbia+ Certificate** — developing LLM-powered workflows for automation and innovation. [\[Link\]](#)
